Flucht und Klima

Herkunft/Rechte: Stadtmuseum Stuttgart [[CC BY-NC-SA](#)]

- In 2015 wurden 19 Millionen Menschen durch Extremwetterereignisse vertrieben (NZZ, 2017).

- In 2050 werden schätzungsweise 140 Millionen Menschen wegen dem Klimawandel flüchten (Welthungerhilfe, 2020).

GROUNDSWELL

Hotspots of internal climate migration will intensify in rural, urban, and coastal systems

People will migrate due to slow-onset climate change impacts—those included in the model are:

Water scarcity

Lower crop productivity

Sea level rise and storm surge

Some places may become less livable—factors examined include:

Heat stress

Extreme events

Land loss

People in the Middle East and Small Island Developing States (SIDS) will also be affected by climate-driven migration

THE NANSEN INITIATIVE

DISASTER-INDUCED CROSS-BORDER DISPLACEMENT

**Global Compact
FOR Migration**

our website

„Climate Faces“: Climate Change has many faces

- We train refugees and people with migration backgrounds to become climate ambassadors
- They share their experiences on climate change in their home countries in (online) Workshops in different educational settings.

Would you like to engage our climate
ambassadors as speakers?
Feel free to contact us at:
